

Credit Name: CSE 2140 2nd Language Programming

Assignment Name: Mastery, Egg cost

Error Log Entry

What error message did you encounter (if any)? At the top my Scanner line was red

What unexpected behavior did your program exhibit? Nothing really

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.) Nothing

Include a screenshot of specific lines of code.

How did you fix the issue? I just put my cursor on top of the red line, and it suggested to make a Scanner and pressed that, and it fixed it

Provide the corrected code or solution using a screenshot.

```
public static void main(String[] args)
//A Scanner object so we can get input from the user
{Scanner input = new Scanner(System.in);

// Asks user to enter amount of eggs
System.out.print("Enter the number of eggs: ");

// the number of eggs entered by the user
int eggs = input.nextInt();

// Calculates the cost of the eggs
double bill = eggs * (0.50 / 12);
```
