

Credit Name:CSE 2140 2nd Language Programming

Assignment Name:Mastery, Egg cost

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

I felt pretty good, because i did the chapter 3 mastery pretty easily so i felt confident

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

I was a bit confused about how much each egg cost, but i just figured it out by looking at the text book

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

Yes, I broke the code up slowly, and did it piece by piece

How did you decide on the tools, data structures, or algorithms to use?

When I got stuck I looked at the text book for help to see what I did wrong

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

Yes, I wrote the code in small pieces and slowly did it

How did you test your solution along the way to make sure it was working?

I tried it every now and then to see if everything was working, but if something was wrong I would find the problem

Overcoming Challenges

What part of the problem was the most difficult for you?

Probably the cost of each egg

How did you handle moments when you felt stuck or unsure of what to do next?

I just stayed calm and looked at my text book for help if I got stuck

Learning

Was there anything you learned that you think will help you with future challenges?

Just working at a good pace and not to over push myself
