

### Instructions:

1. Click on File -> Make a copy

**Include your IPO Chart with your code in Eclipse IDE:** We will discuss and demonstrate this in the computer lab.

## IPO CHART

| Program name:                                                                                    | [TYPE PROGRAM NAME HERE]                                                                         |                                                                                                                                                                                                                           |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| INPUT                                                                                            | PROCESS                                                                                          | OUTPUT                                                                                                                                                                                                                    |
| Hint: What will the user input?                                                                  | Hint: What is the program going to do with the input information?                                | Hint: What will the screen display after user input?                                                                                                                                                                      |
| User enters their package weight in KG, the they will enter the width, length, height all in cm, | The computer will find out if the package is too heavy, or too large, or too large and too heavy | If the package is too heavy it will show on their screen it's too heavy, it will do the same if it's too large! If its too heavy and to large, it will show on the users screen that the package is too heavy and too big |
