

Credit Name:CSE 2140 2nd Language Programming

Assignment Name:Mastery, PackageApplacation

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge? I felt really good going into this mastery because i already had some experience with this type of coding

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion? Not really, I already for this project

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding? No, i planned it out and just went for it

How did you decide on the tools, data structures, or algorithms to use? I was gonna ask the teacher for help

Implementation

Did you write the code in small pieces or attempt the entire solution at once? No, i wrote it all at once and i didnt takea break

How did you test your solution along the way to make sure it was working? I tried it multiply times whenm i was wotking on the coding to see if i messed up somewhere

Overcoming Challenges

What part of the problem was the most difficult for you? I got mixed up where it said , if the package is too big if i had to do only just too big, or to large or if i had to enter too large and too heavy

How did you handle moments when you felt stuck or unsure of what to do next? I just stayed calm and if i got stuck i would just ask the teacher for help

Learning

Was there anything you learned that you think will help you with future challenges? Just to run over the code a couple of times till its perfect and has no mees ups, or it doesnt work
