

Credit Name: CSE 2140 2nd Language Programming

Assignment Name: Mastery, Digits

Error Log Entry

What error message did you encounter (if any)?

Once again, I didn't run into any problems, because I already did a project like this last year

What unexpected behavior did your program exhibit?

It wouldn't show my hundred digit

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

I forgot to add the Hundred code line, so nothing popped up

Include a screenshot of specific lines of code.

```
//Show the work
System.out.println(" Hundreds place: " + hundreds);
System.out.println(" Tenth's place: " + tens);
System.out.println(" Ones place: " + ones);
```

How did you fix the issue?

I added the Hundred code line

Provide the corrected code or solution using a screenshot.

```
//Show the work
System.out.println(" Hundreds place: " + hundreds);
System.out.println(" Tenth's place: " + tens);
System.out.println(" Ones place: " + ones);
```
