Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	[TYPE PROGRAM NAME HERE]	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
User will enter their amount of change in a big number into the script. An example. User will input 250	The computer will take the amount of change the user inputted, and calculate the amount of pennies, nickels, dimes, and quarters the user has in change. For an example. The computer will do the math and find out how many pennies, nickel, dimes, and quarters	The user will see on their screen how many pennies, nickels, dimes, and quarters they have. For an example. 4 quarters, 3 dimes, 1 nickel, and 3 pennies.
