Credit Name:CSE 2110 Procedural Programming 1
Assignment Name:Mastery, DigetSum

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge? Pretty good and confindent

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion? I did stuff like this before so it seemed pretty easy

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding? I broke the problem into smaller pieces to be more safe than sorry

How did you decide on the tools, data structures, or algorithms to use? I was gonna ask the teacher or look at the textbook

Implementation

Did you write the code in small pieces or attempt the entire solution at once? I wrote it in small pieces

How did you test your solution along the way to make sure it was working? I tried it multiple times when i was fisnished to see if i messed up and where to fix my problems

Overcoming Challenges

What part of the problem was the most difficult for you? Codint it so the computer knows what to enter and what numbers

How did you handle moments when you felt stuck or unsure of what to do next? I just stayed calm and if i got stuck i would just ask the teacher for help

Learning

Was there anything you learned that you think will help you with future challenges? Just be calm,and ask for help if i need it
