Credit Name:CSE 2110 Procedural Programming 1
Assignment Name:Mastery, Investment

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge? Really good, since it seemes pretty easy and simple

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion? Not really, I already for this project

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding? I took steps of it, since it is a smaller code and i didnt want to mess anything up

How did you decide on the tools, data structures, or algorithms to use? I was gonna use the textbook

Implementation

Did you write the code in small pieces or attempt the entire solution at once? I wrote it in small pieces

How did you test your solution along the way to make sure it was working? I tried it multiply times whenm i was wotking on the coding to see if i messed up somewhere

Overcoming Challenges

What part of the problem was the most difficult for you? When i had to do the math to find out how many years it would take

How did you handle moments when you felt stuck or unsure of what to do next? I just stayed calm and if i got stuck i would just ask the teacher for help

Learning

Was there anything you learned that you think will help you with future challenges? Just be calm,and ask for help if i need it
