

Credit Name:CSE 2140 2nd Language Programming

Assignment Name: Mastery, Change

Error Log Entry

What error message did you encounter (if any)?

Me persoanlly I did not run into any errors, because I did a project somewhat like this year and I rememberd most of it

What unexpected behavior did your program exhibit?

In one spot It got mixed around with quaters and dimes, so it was all mixed up and i had to fix it

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

I had the dimes above the quaters, so it showed the dimes over the quaters in the question

Include a screenshot of specific lines of code.

How did you fix the issue?

I switched the Dime code line, with the Quarters code line, and it switched

Provide the corrected code or solution using a screenshot.

```
// Show the results
System.out.println();
System.out.println("Quarters: " + quarters);
System.out.println("Dimes: " + dimes);
System.out.println("Nickels: " + nickels);
System.out.println("Pennies: " + pennies);
```
