

Credit Name:CSE 2140 2nd Language Programming

Assignment Name:Mastery, Digits

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

I felt confident because i already had a idea of what i was doing

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

No, i didnt have any

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

I did not, i just went for it

How did you decide on the tools, data structures, or algorithms to use?

If i got stuck i was gonna use the skill builder we did as a class, and see if that would help me

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

I wrote the solution all in one, because we basicaly did it as a skill builder so i already knew what i was doing

How did you test your solution along the way to make sure it was working?

I kept using the code every now and the to see if i messed up anywhere and to see if anything looked wrong

Overcoming Challenges

What part of the problem was the most difficult for you?

probaly adding the hundreds spot with all the other digits

How did you handle moments when you felt stuck or unsure of what to do next?

I stayed calm and looked at the skill builder to see if it would help me, and it indeed did

Learning

Was there anything you learned that you think will help you with future challenges?

Just stay calm and work at a good pace and dont push myself
